A major 2007 study of the impact of Home Rule on liberalism and popular radicalism in Britain and Ireland. Eugenio Biagini argues that between 1876 and 1906 the crisis of public conscience caused by the Home Rule debate acted as the main catalyst in the remaking of popular radicalism. This was not only because of Ireland's intrinsic importance but also because the 'Irish cause' came to be identified with democracy, constitutional freedoms and humanitarianism. The related politics of emotionalism did not aid in finding a solution to either the Home Rule or the Ulster problem but it did create a popular culture of human rights based on the conviction that, ultimately, politics should be guided by non-negotiable moral imperatives. Adopting a comparative perspective, this book explores the common ground between Irish and British democracy and makes a significant contribution to the history of human rights, imperialism and Victorian political culture.

Laila knew in her heart that marriage should be for love, not for duty. Her union with Sheik Jabril would help improve and maintain political stability in her country, as well as bring the people of her province honor and pride. And Jabril was certainly easy on the eyes. He was tall, built like an Olympian, and exuded power and masculinity. But the man was a player of the worst sort, with mistresses all over the world! She realizes that she cannot say no to the Sheik of Surisia, so she respectfully requests that they treat their marriage like the business arrangement that it is. His response? He kisses her! Through that kiss, he demonstrates that he will not accept anything less than her full acquiescence, but she also discovers that his passion and physical presence stir something within her that she cannot control. Their first public event together convinces Jabril that he made an excellent choice for a wife. She is not only stunningly beautiful, but smart and socially

adept. She will be a worthy partner to rule his kingdom, and to share his bed! Her trembling response to his touch excites him, but her suggestion that they essentially live separate lives confounds and amuses him. There is no way he will allow that. The intensity of their first kiss lingers in his memory and he will not relent until he has experienced all she can give. He wants her in his bed, every night. And he will have her!

It is little wonder that relationships between things and humans are front-and-center in the contemporary social sciences, given the presence of technologies in every conceivable aspect of our lives. From Bruno Latour to Ian Hodder, anthropologists and archaeologists are embracing "thing theory" and the "ontological turn." In *Practicing Materiality*, Ruth M. Van Dyke cautions that as anthropologists turn toward animals and things, they run the risk of turning away from people and intentional actions. *Practicing Materiality* focuses on the practical job of applying materiality to anthropological investigations, but with the firm retention of anthropocentrism. The philosophical discussions that run through the nine chapters develop practical applications for material studies, including Heideggerian phenomenology, Gellian secondary agency, object life histories, and bundling. Seven case studies are flanked by an introduction and a discussion chapter. The case studies represent a wide range of archaeological and anthropological contexts, from contemporary New York City and Turkey to fifteenth-century Portugal, the ancient southwest United States, and the ancient Andes. Authors in every chapter argue for the rejection of subject/object dualism, regarding material things as actively involved in the negotiation of power within human social relationships. *Practicing Materiality* demonstrates that it is possible to focus on the entangled lives of things without losing sight of their political and social implications.

An update to Financial and Managerial Accounting for School Administrators: Superintendents, School Business Administrators and Principals, this book and CD includes current best practices, GASB pronouncements, and web-based applications. It also provides school administrators with important accounting background, technique, and applications in the school environment and demonstrates the overall binding effect accounting has on all of the tasks and functions performed by school administrators. Knowledge about accounting and accounting skills pervades all aspects of the day-to-day operation of a school and school district. The proper day-to-day operation of the schools and quality planning and decision-making cannot realistically take place unless administrators and board members have an understanding of school fund accounting. The present and the future will see the need for both financial and managerial accounting. One type will not overshadow the other. Both will continue to evolve and develop to satisfy the needs of society and the education community. Financial and managerial accounting together can be thought of as the process that gathers, produces, organizes, and presents information that can be consumed by a wide variety of users for the purpose of keeping an organization operating, growing, improving, and changing. This book and CD will be useful to superintendents, school business managers, and principals.
