"A Member of the International Code Family."

This comprehensive code comprises all building, plumbing, mechanical, fuel gas and electrical requirements for one- and two-family dwellings and townhouses up to three stories. The IRC contains many important changes such as: An updated seismic map reflects the most conservative Seismic Design Category (SDC) based on any soil type and a new map reflects less conservative SDCs when Site Class A, B or D is applicable. The townhouse separation provisions now include options for using two separate fire-resistant-rated walls or a common wall. An emergency escape and rescue opening is no longer required in basement sleeping

rooms where the dwelling has an automatic fire sprinkler system and the basement has a second means of egress or an emergency escape opening. The exemption for interconnection of smoke alarms in existing areas has been deleted. New girder/header tables have been revised to incorporate the use of #2 Southern Pine in lieu of #1 Southern Pine. New tables address alternative wood stud heights and the required number of full height studs in high wind areas.

Offers the latest regulations on designing and installing commercial and residential buildings.

Practical and reader-friendly, the 2012 INTERNATIONAL BUILDING CODE COMMENTARY, VOLUME 1 is a powerful

resource that addresses the practical implications of the code so critical for anyone in or entering the building industry. Its effectiveness lies in its use of a unique formula that has made previous editions so successful: it combines the full text of the code with valuable commentaries that offer a more in-depth and applied understanding of its regulations. Although it includes the technical requirements of the code, it goes beyond these to explore its meaning, its applications, and the potential consequences when it is not followed. Volume 1 focuses on the provisions contained in chapters one through 15. Coverage is detailed, but never overwhelming, making it a must-have for code officials, engineers, architects, inspectors, plans examiners, contractors, and anyone seeking a more solid understanding of the 2012 International Building Code.
