Note Making Class 11 CBSE Format, Examples - CBSE Tuts

Prove that $(a+2b+3c+4d)^2 \geq a^2+b^2+c^2+d^2+2ab+2bc+2cd$: By weighted AM-GM we have $a^2+b^2+c^2+d^2+2ab+2bc+2cd \geq (a+b+c+d)^2$. Consequently, it is enough to prove that $(a^2+b^2+c^2+d^2)(a+2b+3c+4d) \geq (a+b+c+d)^3$. Expand both sides to get $a^3+b^2a+c^2a+d^2a+2a^2b+2b^3+2b^2c+2d^2b+3a^2c+3b^2c+3c^3+3d^2c+4a^2d+4b^2d+4c^2d+4d^3$.

IMO 2020 Solution Notes - Evan Chen

Solution is a homogeneous mixture of two or more substances in same or different physical phases. The substances forming the solution are called components of the solution. On the basis of number of components a solution of two components is called binary solution.

CBSE Notes Class 12 Chemistry Solutions | AglaSem Schools

Solution: The first and second characteristic polynomials of the method are $\chi(z) = z^2 - 1$, $\chi(z) = (z+3)^2$. Therefore the stability polynomial is $\chi(r; h) = \chi(r) - h^2 \chi(r) = r^2 - 1 - h^2(r^2 - 1)$. Now, $|\chi(r; h)| = |1 - h^2(r^2 - 1)|$. Clearly, $|\chi(0; h)| > |\chi(0, h)|$ if and only if $h \in (0, 3)$.

Numerical Solution of Ordinary Differential Equations

Begin by familiarising children with the context: Using digit cards, put and in one envelope and write their total on the outside (or on a "post-it" note stuck to the envelope). Put and in another envelope, again writing their total on the envelope. Explain that the other two cards will go in the last envelope. What will the total be?

Sealed Solution - NRICH

The Solution below shows the position of note E-flat on the piano, treble clef and bass clef. The Lesson steps then describe the note characteristics and relationship with the notes around it, and also lists which scales the note is in. For a quick summary of this topic, have a look at Note name.
