Presenting current research in an innovative text-reader format, Aging: Concepts and Controversies, Ninth Edition encourages students to become involved and take an informed stand on the major aging issues we face as a society. Not simply a summary of research literature, Harry R. Moody and Jennifer R. Sasser's text focuses on controversies and questions, rather than on assimilating facts or arriving at a single "correct" view about aging and older people.

Disengagement Theory. The Disengagement Theory, one of the earliest and most controversial theories of aging, views aging as a process of gradual withdrawal between society and the older adult. This mutual withdrawal or disengagement is a natural, acceptable, and universal process that accompanies growing old.

BACKGROUND: Given our aging population, there's great interest in identifying modifiable risk factors for cognitive decline. Studies have highlighted the relationship between aspects of mobility and cognitive processes. However, cognition and mobility are both multifaceted concepts and their interrelationships remain to be well defined.

The conceptual link between aging and psychological stress is the construct "allostatic load" i.e. the notion that a repeated and cumulative disturbance of homeostasis may lead to certain syndromes that are triggered by a dysregulation of the chronic stress response. We summarize the markers of this hypothetical process at primary, secondary and tertiary stages, with particular ...

An array of technologies for preventing and treating age-related neural decline and disease are currently under development. A clear framework for how to identify groups in need of such inventions is needed. An encompassing concept of frailty could provide a solid basis for such purposes. Concepts of frailty, including physical and cognitive frailty, are currently applied in clinical settings ...
