Alpine's CDA-9883 CD receiver powers your music with a high-powered internal amplifier. Your music will sound full-bodied and strong at normal listening levels, and you'll have the headroom to really crank the volume when you want to. You'll also find a stylish fold-down face, easy-to-use controls, and plenty of options for expanding your system.

Alpine CDA-9883 CD receiver with MP3/WMA/AAC playback at
I actually zeroed on three units - two of being pioneer (\$180 and \$160) and the other being the Alpine CDA -9883. This is radio has 3 RCA outputs (for amplifier, subwoofer (s)), is HD radio ready, SAT radio ready and of course plays mp3's and AAC's. The best thing I like about this product is its integration with the IPOD.

In any job, there will come a time when you are asked to lead other people. But while people are often well trained in the skill set of their particular profession, few people are ever taught how to lead. As such, those first steps into leadership can seem daunting - what do you actually do? How do you really lead? How do you build an effective team? And how do you lead colleagues who used to be your peers? How to Lead Others aims to convey the basics of leadership in a way that is concise, relevant and practical by breaking down leadership into eight simple lessons: · Defining the task; · Effective planning; · Briefing; · Controlling; · Motivating; · Organizing; · Evaluating; and · Leading by example. Aimed at those who, regardless of industry or business sector, are about take their first steps on the leadership path, or who are at an early stage in their career and realise that leadership responsibilities lie ahead of them, How to Lead Others is the essential handbook to one of the most important and challenging aspects of professional life.

In her new book, award-winning journalist Marci McDonald draws back the curtain on the mysterious world of the right-wing Christian nationalist movement in Canada and its many ties to the Conservative government of Stephen Harper. To most Canadians, the politics of the United States - where fundamentalist Christians wield tremendous power and culture wars split the country - seem too foreign to ever happen here. ButThe Armageddon Factorshows that the Canadian Christian right - infuriated by the legalization of same-sex marriage and the increasing secularization of society - has been steadily and stealthily building organizations, alliances and contacts that have put them close to the levers of power and put the government of Canada in their debt. Determined to outlaw homosexuality and abortion, and to restore Canada to what they see as its divinely determined destiny to be a nation ruled by Christian laws and precepts, this group of true believers has moved the country far closer to the American mix of politics and religion than most Canadians would ever believe. McDonald's book explores how a web of evangelical far-right Christians have built think-tanks and foundations that play a prominent role in determining policy for the Conservative government of Canada. She shows how Biblical belief has allowed Christians to put dozens of MPs in office and to build a power base across the country, across cultures and even across religions. "What drives that growing Christian nationalist movement is its adherents' conviction that the end times foretold in the book of Revelation are at hand," writes McDonald. "Braced for an impending apocalypse, they feel impelled to ensure that Canada assumes a unique, scripturally ordained role in the final days before the Second Coming - and little else." The Armageddon Factorshows how the religious right's influence on the Harper government has led to hugely important but little-known changes in everything from foreign policy and the makeup of the courts to funding for scientific research and social welfare programs like daycare. And the book also shows that the religious influence is here to stay, regardless of which party ends up in government. For those who thought the religious right in Canada was confined to rural areas and the west, this book is an eye-opener, outlining to what extent the corridors of power in Ottawa are now populated by true believers. For anyone who assumed that the American religious right stopped at the border.The Armageddon Factorexplains how US money and evangelists have infiltrated Canadian politics. This book should be essential reading for Canadians of every religious belief or political stripe. Indeed,The Armageddon Factorshould persuade every Canadian that, with the growth of such a movement, the future direction of the country is at stake. From the Hardcover edition.

xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland

technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language: life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adapter which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

BOARD BOOK. Pages feature bright illustrations of favourite tractors and trains, with simple text to listen to or read. Each book has an integral sound button for little fingers to press, so that children can hear sounds like the tractor's engine or the train's whistle. Encourage speaking skills, help to develop handeye coordination and build early vocabulary.

Junior Theory Level 1 - a foundational music theory book specifically designed for children aged 4-7.
