Objective: To investigate the antidiabetic and antihyperlipidemic activities of polyherbal formulation (PHF) containing hydroalcoholic extracts of four plants namely *Salacia oblonga*, *Salacia roxburgii*, *Garcinia indica* and *Lagerstroemia parviflora* in streptozotocin (STZ)-induced diabetic rats by administering oral doses (200 and 400 mg/kg body weight).

Antidiabetic and antihyperlipidemic activities of a novel ...

Thiazolidinediones lower Hb1c effectively by 1% as monotherapy in T2DM, where they particularly do not cause hypoglycaemia like insulin or insulin secretagogues (i.e. sulfonylureas), and they can be used in combination with other anti-diabetic agents. 53 The first-line drug metformin is often mentioned as an insulin sensitizer, but its primary ...

Cardiovascular safety of anti-diabetic drugs | European ...

Metformin monotherapy can lower FPG by 60 to 70 mg/dl and lower hemoglobin A1c by 1.5 to 2%. Metformin also decreases triglyceride concentrations, LDL cholesterol, total cholesterol, and body weight, and increases HDL cholesterol. When used as monotherapy, metformin has not been associated with hypoglycemia.

Pharmacotherapy Update | A Review of Oral Antidiabetic Agents

Affuso ' s group found, when combined with 200mg of red yeast rice, 500mg of berberine led to significant reductions in total cholesterol, LDL, and triglycerides after a six-week trial.7 Kong ' s group found berberine added to the

Low-density lipoprotein (LDL) cholesterol is regarded as "bad cholesterol." It's the soft, waxy stuff that can accumulate in the bloodstream and interfere with the flow of blood. High-density lipoprotein (HDL)—the so-called "good cholesterol"—helps keep blood vessels clear by carrying LDL cholesterol to the liver for disposal.

How to Eat if You Have High Cholesterol and Diabetes

A recent study stated that naringenin (25 mg/kg bw) treatment to diabetic rats for 45 days markedly reduced hyperglycemia and hyperinsulinemia, restored lipid profile changes, decreased membrane lipid peroxidation; enhanced the activities of antioxidants and improved hepatic function markers [81].

Antidiabetic properties of dietary flavonoids: a cellular ...

Cholesterol lowering effect Cardiovascular disease is the leading cause of mortality accounting for more than half of the total mortalities (Lee and others 2007 ; Lloyd Jones and others 2010). Cholesterol, elevated blood pressure, smoking, and physical inactivity are among the major risk factors for cardiovascular disease (Beaglehole 2001 ...

Functional Properties of Vinegar - Budak - 2014 - Journal ...

Traditionally cumin has been used from the middle ages for antibacterial, antidiabetic and antioxidant properties. Additionally, cumin has been used for high cholesterol, acid reflux, jaundice and diarrhea and even weight loss.
