Biotechnology Regulation and GMOs

EU regulation on GMOs, in particular, has been unable to keep up with new discoveries in the field of biotechnology. As a result, a significant degree of legal uncertainty makes the law itself unclear and ineffective. Read More: Can't agree on harmfulness of GMO maize Need to consider socio-economic factors

How should we regulate GMOs?

Lee maintains that the regulation of GMOs is intimately connected with the rights, interests, and liabilities awarded and arbitrated through intellectual property law. Intellectual property rights play a role in shaping the relationship between the biotechnology industry and its stakeholders, including farmers, consumers, and the broader public.

The EU legal framework for GMO regulation : Biotechnology ...

The U.S. regulatory policy is governed by the Coordinated Framework for Regulation of Biotechnology. The policy has three tenets: " (1) U.S. policy would focus on the product of genetic modification (GM) techniques, not the process itself, (2) only regulation grounded in verifiable scientific risks would be tolerated, and (3) GM products are on a continuum with existing products and, therefore, existing statutes are sufficient to review the products."
