Commodore VZ Engine Relay - qusenofinquiry.com  
Shitty V6 VZ won't start. It was parked on a steep hill, it started then went a few meters then died and refuses to start again. Low fuel, service vehicle soon and traction control errors (strange because it doesn't have it) keep popping up. Tried a new battery, checked fuses added 10L of fuel because it was low before. Same thing.

VZ not starting - PerformanceForums  
The Holden Commodore (VZ) is a full size car that was produced by the Australian manufacturer Holden from 2004 to 2006 as a sedan, and to 2007 as a wagon and Ute sold alongside the new VE series.It was the fourth and final iteration of the third generation of this Australian made model and the last to spawn a coup é variant. Its range continued to include the luxury variants, Holden Berlina ...

Pin 87 will be the relay output and 30 should be the constant power source. 85 and 86 should be the terminals for the relay coil. One will be grounded in park and neutral and the other will have power with the key in the crank position. You'll want to see which one if these is missing when it won't start.
