Neurolaryngology brings together in one volume the latest concepts in this important and developing field. In order to make this text as useful as possible for clinicians, selected chapters on general concepts important to clinical care have been included, including chapters on history, physical examination, clinical voice laboratory assessment, common diagnoses and treatments, and other topics important to all voice patients, including those with neurolaryngological complaints. Starting with a perspective on modern voice medicine, including neurolaryngology and a brief historical overview of the development of laryngology, the text goes on to describe neuroanatomy and physiology, laryngeal function, and the role of chaos in voice disorders. It contains fascinating new ideas on applications of nonlinear dynamics to voice care and research, a topic of great relevance in neurolaryngology. Beginning the section on clinical assessment of voice disorders is a description of the current approach to history and physical examination recommended for patients with neurolaryngological voice disorders. The text contains the most current research and references throughout, presenting the latest information about many conditions, including some rarely covered in the laryngologic literature; it highlights diagnosis and treatment of a wide array of motor and sensory disorders that may impair voice. The interdisciplinary expertise of numerous authors has

been invaluable in the preparation of this text; however, every effort has been made to maintain style and continuity throughout. Clinically relevant and thought provoking, *Neurolaryngology* is the definitive encyclopedic reference in this new subspecialty of laryngology.

Legendary football coach and Super Bowl champion with the Denver Broncos, Wade Phillips, recalls his life in football and memories of his father, NFL head coach Bum Phillips, in a book perfect for a Father's Day gift. "Having played for and against Wade Phillips, the first word that comes to my mind is respect. SON OF BUM is a great read about the Xs and Os from one of the greatest coaches in the league, as well as a loving tribute to the influence of family."—Peyton Manning In his memoir *Son of Bum*, decorated NFL coach Wade Phillips shows that the roots of his knowledge come from his father, Bum Phillips. A beloved character in NFL history, Bum taught Wade from the beginning that "coaching isn't bitching," as well as how to have perspective on the game during tough times. These are lessons that apply both on the field and off, and Wade has passed this wisdom down to his son, Wes Phillips, an NFL coach himself. Known for his homespun, plain-talking ways, Wade is a groundbreaking coach who has long believed in using support and camaraderie—instead of punishment and anger—to inspire his players to be winners on and off the field. And though his defensive concepts are revolutionary, he would say they begin with common sense. *Son of Bum* is more than one man's memoir—it's a story of family and football and a father who inspired his son.

The book focuses on soft computing and its applications to solve real-world problems in different domains, ranging from medicine and health care, to supply chain management, image processing and cryptanalysis. It includes high-quality papers presented at the International Conference on Soft Computing: Theories and Applications (SoCTA 2018), organized by Dr. B. R. Ambedkar National Institute of Technology, Jalandhar, Punjab, India. Offering significant insights into soft computing for teachers and researchers alike, the book inspires more researchers to work in the field of soft computing.

This book presents selected research papers on current developments in the fields of soft computing and signal processing from the Third International Conference on Soft Computing and Signal Processing (ICSCSP 2020). The book covers topics such as soft sets, rough sets, fuzzy logic, neural networks, genetic algorithms and machine learning and discusses various aspects of these topics, e.g., technological considerations, product implementation and application issues.
