The three-volume set LNCS 8673, 8674, and 8675 constitutes the refereed proceedings of the 17th International Conference on Medical Image Computing and Computer-Assisted Intervention, MICCAI 2014, held in Boston, MA, USA, in September 2014. Based on rigorous peer reviews, the program committee carefully selected 253 revised papers from 862 submissions for presentation in three volumes. The 100 papers included in the second volume have been organized in the following topical sections: biophysical modeling and simulation; atlas-based transfer of boundary conditions for biomechanical simulation; temporal and motion modeling; computer-aided diagnosis; pediatric imaging; endoscopy; ultrasound imaging; machine learning; cardiovascular imaging; intervention planning and guidance; and brain.

This book constitutes the refereed proceedings of the 18th International Symposium on Formal Methods, FM 2012, held in Paris, France, in August 2012. The 28 revised full papers presented together with 7 tool papers and 3 invited talks were carefully reviewed and selected from numerous submissions. The papers cover several aspects of formal methods, including verification, synthesis, runtime monitoring, testing and controller synthesis, as well as novel applications of formal methods in interesting domains such as satellites, autonomous vehicles and disease dynamics.

Pulitzer Prize-winning journalist Walter Pincus exposes the darkest secret in American nuclear history—sixty-seven nuclear tests in the Marshall Islands that decimated a people and their land. The most important place in American nuclear history are the Marshall Islands—an idyllic Pacific paradise that served as the staging ground for over sixty US nuclear tests. It was here, from 1946 to 1958, that America perfected the weapon that preserved the peace of the post-war years. It was here—with the 1954 Castle Bravo test over Bikini Atoll—that America executed its largest nuclear detonation, a thousand times more powerful than Hiroshima. And it was here that a native people became unwilling test subjects in the first large scale study of nuclear radiation fallout when the ashes rained down on powerless villagers, contaminating the land they loved and forever changing a way of life. In *Blown to Hell*, Pulitzer Prize-winning journalist Walter Pincus tells for the first time the tragic story of the Marshallese people caught in the crosshairs of American nuclear testing. From John Anjain, a local magistrate of Rongelap Atoll who loses more than most; to the radiation-exposed crew of the Japanese fishing boat the Lucky Dragon; to Dr. Robert Conard, a Navy physician who realized the dangers facing the islanders and attempted to help them; to the Washington power brokers trying to keep the unthinkable fallout from public view . . . *Blown to Hell* tells the human story of America's nuclear testing program. Displaced from the only homes they had known, the native tribes that inhabited the serene Pacific atolls for millennia before they became ground zero for America's first thermonuclear detonations returned to homes despoiled by radiation—if they were lucky enough to return at all. Others were ripped from their ancestral lands and shuttled to new islands with little regard for how the new environment supported their way of life and little acknowledgement of all they left behind. But not even the disruptive relocations allowed the islanders to escape the fallout.

From a journalist on the frontlines of the *Students for Fair Admission (SFFA) v. Harvard* case comes a probing examination of affirmative action, the false narrative of American meritocracy, and the attack on Asian American excellence with its far-reaching implications—from seedy test-prep centers to gleaming gifted-and-talented magnet schools, to top colleges and elite business, media, and political positions across America. Even in the midst of a nationwide surge of bias and incidents against them, Asians from coast to coast have quietly assumed mastery of the nation's technical and intellectual machinery and become essential American workers. Yet, they've been forced to do so in the face of policy proposals?written in the name of diversity?excluding them from the upper ranks of the elite. In *An Inconvenient Minority*, journalist Kenny Xu traces elite America's longstanding unease about a minority potentially upending them. Leftist agendas, such as eliminating standardized testing, doling out racial advantages to “preferred” minorities, and lumping Asians into “privileged” categories despite their deprived historical experiences have spurred Asian Americans to act. Going beyond the *Students for Fair Admission (SFFA) v. Harvard* case, Xu unearths the skewed logic rippling countrywide, from Mayor Bill de Blasio's attempted makeover of New York City's Specialized School programs to the battle over “diversity” quotas in Google's and Facebook's progressive epicenters, to the rise of Asian American activism in response to unfair perceptions and admission practices. Asian Americans' time is now, as they increase their direct action and amplify their voices in the face of mounting anti-Asian attacks. *An Inconvenient Minority* chronicles the political and economic repression and renaissance of a long ignored racial identity group?and how they are central to reversing America's cultural decline and preserving the dynamism of the free world.

**** COMPELLING - The Sunday Telegraph CONTROVERSIAL ... Sounes' book pushes the standard Reed narrative - The New York Times Lou Reed, who died in 2013, was best known to the general public as the grumpy New Yorker in black who sang 'Walk on the Wild Side'. To his dedicated admirers, however, he was one of the most innovative and intelligent American songwriters of modern times, a natural outsider who lived a tumultuous and tortured life. In this in-depth, meticulously researched and very entertaining biography, respected biographer Howard Sounes examines the life and work of this fascinating man, from birth to death, including his time as the leader of The Velvet Underground - one

of the most important bands in rock'n'roll. Written with a deep knowledge and understanding of the music, Sounes also sheds entirely new light on the artist's creative process, his mental health problems, his bisexuality, his three marriages, and his addictions to drugs and alcohol. In the course of his research, Sounes has interviewed over 140 people from every part of Lou Reed's life - some of whom have not spoken publicly about him before - including music industry figures, band members, fellow celebrities, family members, former wives and lovers. This book brings Lou Reed and his world alive.

Each edition of "Foundation Reporter gives you all the important contact, financial and grants information on the top 1,000 private foundations in the United States.
