1. Decide what size you would like the head to be and sketch it onto your paper. 2. Measure the head however you like and from the head, mark the paper six and half times more times. The ratio of head to body is roughly 1:7.5-8 so in total you should have 7.5-8 marks. These marks will help you judge how to draw the rest of the body. 3.

"A book of fundamentals for an artistic career"--Jkt.

A unique pictorial guide to the techniques of drawing the human head

Presents instructions for drawing heads and hands of men, women, infants, and children.

In this innovative guide, master art instructor William Maughan demonstrates

how to create a realistic human likeness by using the classic and highly accurate modeling technique of chiaroscuro (Italian for "light and dark") developed by Leonardo da Vinci during the High Renaissance.

Maughan first introduces readers to the basics of this centuries-old technique, showing how to analyze form, light, and shadow; use dark pencil, white pencil, and toned paper to create a full range of values; use the elements of design to enhance a likeness; and capture a sitter's gestures and proportions. He then demonstrates, step by step,

how to draw each facial feature, develop visual awareness, and render the head in color with soft pastels.

Jack B. Hamm was an American artist from Wichita, Kansas who is recognized both for his Christian-themed artwork and editorial cartoons, and for his books on drawing technique. He both studied and taught at the Frederic Mizen Academy of Art.

Many of us want to learn “how to draw.” But as artist Anthony Ryder explains, it’s much more important to learn what to draw. In other words, to observe and draw

what we actually see, rather than what we think we see. When it comes to drawing the human figure, this means letting go of learned ideas and expectation of what the figure should look like. It means carefully observing the interplay of form and light, shape and line, that combine to create the actual appearance of human form. In *The Artist's Complete Guide to Figure Drawing*, amateur and experienced artists alike are guided toward this new way of seeing and drawing the figure with a three-step drawing method. The book's progressive course starts with the block-in, an exercise in seeing

and establishing the figure's shape. It then build to the contour, a refined line drawing that represents the figure's silhouette. The last step is tonal work on the inside of the contour, when light and shadow are shaped to create the illusion of form.

Separate chapters explore topics critical to the method: gesture, which expresses a sense of living energy to the figure; light, which largely determines how we see the model; and form, which conveys the figure's volume and mass. Examples, step-by-steps, and special "tips" offer helpful hints and practical guidance
