Eons ago, God created legions of angels----perfect, beautiful beings who never knew sickness, sorrow, or death. Eternal beings whose only emotion they had ever known was love. Love for each other and love for God, their creator. The angels lived with God in paradise, in an everlasting heaven filled with a contentment of unconditional love that can only be imagined. Not one wanted anything more than to spend eternity just as it was. But God had plans for them, each and every one. They were to

Abstract: "People demonstrate a remarkable ability to perform complex, multiple-task activities in spite of the limitations of our sensory, perceptual, cognitive, and motor systems. A prominent theory that addresses how multiple-tasks activities are performed is that of the executive process. Some of the functions of the executive process include enforcing task priorities and arbitrating access to limited resources. It has been shown that a time-sharing skill (or executive-process knowledge) is acquired during training on dual-task combinations. This dissertation presents the development of a computational, task-independent framework for modeling the acquisition of the knowledge acquired during training on dual-task combinations -- executive process knowledge. On a selected dual-task combination -- a continuous tracking task and a discrete two-choice reaction time task -- this framework, when given the declarative and procedural representation of the novice task, has produced an expert model whose performance is a good match to empirical reaction time and tracking error data for the task combination. There are three main contributions of this work. First is the development of EPIC-Soar, a symbolic hybrid architecture that possesses a psychologically-motivated learning mechanism and psychologically-plausible perception and motor systems. Second is the identification and classification of executive process knowledge and the taxonomies that result from this analysis. Third, is an acquisition framework which consists of: a novel data structure for representing task strategies; a task-independent procedure for resolving simultaneous access for motor resources and learning new knowledge that avoids such collisions in the future; a second task-independent learning procedure which refines the strategy data structure and creates new procedural knowledge for performing the task; and a collection of guidelines that regulate how and when promotions are applied."

8 starred reviews - Goodreads Choice Awards Best of the Best · William C. Morris Award Winner · National Book Award Longlist · Printz Honor Book · Coretta Scott King Honor Book · #1 New York Times Bestseller! "Absolutely riveting!" —Jason Reynolds "Stunning." —John Green "This story is necessary. This story is important." —Kirkus (starred review) "Heartbreakingly topical." —Publishers Weekly (starred review) "A marvel of verisimilitude." —Booklist (starred review) "A powerful, in-your-face novel." —Horn Book (starred review) Sixteen-year-old Starr Carter moves between two worlds: the poor neighborhood where she lives and the fancy suburban prep school she attends. The uneasy balance between these worlds is shattered when Starr witnesses the fatal shooting of her childhood best friend Khalil at the hands of a police officer. Khalil was unarmed. Soon afterward, his death is a national headline. Some are calling him a thug, maybe even a drug dealer and a gangbanger. Protesters are taking to the streets in Khalil ' s name. Some cops and the local drug lord try to intimidate Starr and her family. What everyone wants to know is: what really went down that night? And the only person alive who can answer that is Starr. But what Starr does—or does not—say could depend her community. It could also endanger her life. Want more of Garden Heights? The main objective of this report is to review the monitoring and evaluation (M&E) frameworks, tools and guidance documents that are available for climate-smart agriculture (CSA), and in particular for objective (" pillar ") two on adaptation and resilience. The report is a literature review and does not propose a new methodology. It is not an exhaustive list, but summarises the main M&E frameworks. This report represents the first step towards the development of operational guidelines for the design and implementation of national M&E frameworks for CSA, to be developed during the first quarter of 2019. The envisioned operational guidelines will address the core constraints and needs of Member States on both the design and implementation of an M&E system that can simultaneously address CSA and sector reporting requirements for the 2030 Agenda climate instruments. These guidelines will address the principal need expressed by Member States that M&E systems and indicators should be simple and not onerous. The intended users are practitioners designing CSA projects at country level and policy-makers coordinating national-sector monitoring and reporting efforts on climate change under the following three global agreements: the United Nations 2030 Agenda for Sustainable Development, the Sendai Framework for Disaster Risk Reduction, and the United Nations Framework Convention on Climate Change (UNFCCC) Paris Agreement of 2015.
