Author of The Chronicles Of Thomas Covenant, one of the most acclaimed fantasy series of all time, master storyteller Stephen R. Donaldson returns with the second book in his long-awaited new science fiction series—a story about dark passions, perilous alliances, and dubious heroism set in a stunningly imagined future. Beautiful, brilliant, and dangerous, Morn Hyland is an ex-police officer for the United Mining Companies—and the target of two ruthless, powerful men. One is the charismatic ore-pirate Nick Succorso, who sees Morn as booty wrested from his vicious rival, Angus Thermopyle. thermopyle once made the mistake of underestimating Morn and now he's about to pay the ultimate price. Both men think they can possess her, but Morn is no one's trophy—and no one's pawn. Meanwhile, within the borders of Forbidden Space, wait the Amnioin, an alien race capable of horrific atrocities. The Amnion want something unspeakable from humanity—and they will go to unthinkable lengths to get it. In Forbidden Knowledge, Stephen R. Donaldson spins a galaxy-wide web of intrigue, deception, and betrayal that tightens with inexorable strength around characters and readers alike.

The Real Story was just a preview to this action-packed tome... The Gap series steps on the accelerator with Forbidden Knowledge. Beautiful cop Morn Hyland, desperate and in pain aboard Captain's Fancy, controls her body and mind with her illegal zone implant, recreating herself as a superbeing worthy of holding Captain Nick Succorso's affections. Jealousy among the crew, threats of rape and ship self-destruction, prisoner torture, and government cyborg programs keep things moving along. Alien Amnioni seeking genetic domination over humankind enter the scene with new technologies such as mutagens and force-growing fetuses. Bite your fingernails while you live it all (vicariously!) through brilliant survivor Morn and villain-turned-conspirator Angus Thermopyle.

Morn Hyland uses the powers of her brain implant to defend against an alien race that turns human bodies into inhuman forms

Author of The Chronicles Of Thomas Covenant, one of the most acclaimed fantasy series of all time, master storyteller Stephen R. Donaldson returns with this exciting and long-awaited new series that takes us into a stunningly imagined future to tell a timeless story of adventure and the implacable conflict of good and evil within each of us. Angus Thermopyle was an ore pirate and a murderer: even the most disreputable asteroid pilots of Delta Sector stayed locked out of his way. Those who didn't ended up in the lockup—or dead. But when Thermopyle arrived at Mallory's Bar & Sleep with a gorgeous woman by his side the regulars had to take notice. Her name was Morn Hyland, and she had been a police officer—until she met up with Thermopyle. But one person in Mallory's Bar wasn't intimidated. Nick Succorso had his own reputation as a bold pirate and he had a sleek frigate fitted for deep space. Everyone knew that Thermopyle and Succorso were on a collision course. What nobody expected was how quickly it would be over—or how devastating victory would be. It was common enough example of rivalry and revenge—or so everyone thought. The REAL story was something entirely different. In The Real Story, Stephen R. Donaldson takes us to a remarkably detailed world of faster-than-light travel, politics, betrayal, and a shadowy presence just outside our view to tell the fiercest, most profound story he has ever written.

What exactly is life? What exactly is man, and why do we exist at all? Does the planet, our host, need the human species? Would planet Earth look different and fare better without us/its top predator/on the loose? If yes, how long until Earth decides to shake man off for good? The answers to these questions might surprise you! Humankind must answer these queries if we want to avoid extinction in the future, but will we be able to uncover the truth before the inevitable? The Forbidden Knowledge fills the horrific gap in worldwide education, sharing information about the health and wellbeing of our society. Step beyond the simplicity of mathematics, chemistry, and physics into knowledge that could save the world.

The Gap series comes to a shattering climax in a cataclysmic showdown that will mean either the survival of all humankind . . . or its absorption and annihilation. Drifting in space, sabotaged by a crewman tainted with an alien mutagen, the starship Trumpet broadcasts to any ship in range the formula of the mutagen's antidote/a drug the United Mining Companies has suppressed for its own sinister purposes. Aboard the crippled ship, the fugitives and survivors:Morn Hyland, an ex-UMCP cop, Angus Thermopyle, a newly freed cyborg, and unwilling saboteur Ciro Vasaczkimust make a desperate gamble. Pursued by the UMCP ship Punisher, threatened by the return of an Amnion combat vessel, they will hijack the police craft by any means necessary/and take it back to Earth.

An examination of the meaning of moral responsibility in literature and our everyday lives suggests that we live in a violated world that dismisses taboos

From the author of the acclaimed Li Du novels comes Elsa Hart's new atmospheric mystery series. London, 1703. In a time when the old approaches to science coexist with the new, one elite community attempts to understand the world by collecting its wonders. Sir Barnaby Mayne, the most formidable of these collectors, has devoted his life to filling his cabinets. While the curious-minded vie for invitations to study the rare stones, bones, books, and artifacts he has amassed, some visitors come with a darker purpose. For Cecily Kay, it is a passion for plants that brings her to the Mayne house. The only puzzle she expects to encounter is how to locate the specimens she needs within Sir Barnaby's crowded cabinets. But when her host is stabbed to death, Cecily finds the confession of the supposed killer unconvincing. She pays attention to details:years of practice have taught her that the smallest particulars can distinguish a harmless herb from a deadly one/and in the case of Sir Barnaby's murder, there are too many inconsistencies for her to ignore. To discover the truth, Cecily must enter the world of the collectors, a realm where intellect is distorted by obsession and greed. As her pursuit of answers brings her closer to a killer, she risks being given a final resting place amid the bones that wait, silent and still, in the cabinets of Barnaby Mayne.

Linden Avery returns to the Land in search of her kidnapped mentally ill son, whom she discovers fully healed and at the side of her believed-dead beloved, Thomas Covenant, leading an attack on Revelstone.

As the planetoid Thanatos Minor explodes into atoms, a specially-fitted cruiser escapes the mass destruction and hurtles into space only a step ahead of hostile pursuit. On board Trumpet are a handful of bedraggled fugitives from an outlaw world - old enemies suddenly and violently thrown together in a desperate bid for survival. Among this unlikely crew of allies are Morn Hyland, once a UMC cop, now a prisoner to the electrodes implanted in her brain; her son, Davies, "force-grown" to adulthood by the alien Amnion and struggling to understand his true identity; the amoral space buccaneer Nick Succorso, whose most daring act of piracy could be his last; and Angus Thermopyle, unstoppable cyborg struggling to wrest control of his own mind from his UMC programmers.
