administrating

approximately 65

percent of them. The

oldest recognized

nursing specialists,

nurse anesthetists

have touched millions

of lives over the

years. Although

anesthesia may be

thought of as merely

putting patients to

Bookmark File

PDF Gizmo

sleep so they will not experience surgical pain, nurse anesthetists also play an important role acting as the patient's eyes and ears during surgery, essentially serving as a patient advocate because the patient is unconscious and cannot speak. Often the CRNA is the last

Bookmark File

PDF Gizmo

person a patient sees before being put under, and it is the CRNA who offers comfort and confident reassurance, and then proceeds to watch over the patient like a guardian angel. CRNAs are an integral part of the entire operative process. After inducing sleep,

Bookmark File

PDF Gizmo

they monitor vital signs, adjust anesthesia levels, and wake the patient after surgery. Throughout, they are vigilant monitors of every heartbeat and every breath, as they must be ready to respond if something is not right, such as a patient having a negative response to

Bookmark File

PDF Gizmo

a certain anesthetic.

Fortunately, according to a recent Institute of Medicine report, due to advances in the field, anesthesia is approximately 50 times safer than it was as recently as the 1980s. Nurse anesthetists have been blazing trails in the field since the

Bookmark File

PDF Gizmo

Civil War, when they were responsible for giving soldiers ether during surgery. Since then they have been the principal providers of anesthesia care to US military personnel on the front lines. The CRNA credential was first established in 1956, and today approximately
