For the almost 40 years of its existence, ANPOCS has contributed to introducing or consolidating new thematic areas in the academic agenda of debates in the Brazilian social sciences. Commensurate with this history, at the 37th Annual meeting, hosted in Águas de Lindoia, São Paulo, in 2013, we organized a large International Symposium, The BRICS and their social, political and cultural challenges on the national and international levels. There were six sessions of debates, gathered under the umbrella of "Development and public policies," "Social inclusion and social justice," and "Emerging powers and transformations in the international system," followed by a final plenary session. Around 30 anthropologists, political scientists, sociologists and researchers in international relations from Brazil, Russia, India, China and South Africa, met over three highly productive days. As might be expected at ANPOCS, the encounter was marked not only by the diversity of countries and disciplines, but also by the theoretical and political diversity of the participants, something already apparent in the composition of the Brazilian coordinators of the Symposium. This book is just one tangible outcome of the papers and dialogues emerging from this encounter. Like the Symposium, the volume is divided into three sections. Looking to address an international readership, it is published in Portuguese and English

This inclusive cross-cultural study rethinks the nexus between engineering education and context. In so doing the book offers a reflection on contextual boundaries with an overall boundary crossing ambition and juxtaposes important cases of critical participation within engineering education with sophisticated scholarly reflection on both opportunities and discontents. Whether, and in what way engineering

education is or ought to be contextualized or de-contextualized is an object of heated debate among engineering educators. The uniqueness of this study is that this debate is given comprehensive coverage - presenting both instrumentally inclined as well as radical positions on transforming engineering education. In contextualizing engineering education, this book offers diverse commentary from a range of disciplinary, meta- and interdisciplinary perspectives on how cultural, professional, institutional, and educational systems contexts shape histories, structural dynamics, ideologies and challenges as well as new pathways in engineering education. Topics addressed include examining engineering education in countries ranging from India to America, to racial and gender equity in engineering education and incorporating social awareness into the area. Using context as "bridge" this book confronts engineering education head on. Contending engineering ideologies and corresponding views on context are juxtaposed with contending discourses of reform. The uniqueness of the book is that it brings together scholars from the humanities, the social sciences and engineering from Europe - both East and West - with the United States, China, Brazil, India and Australia.

Youth are, by definition, the future. This book brings initial analyses to bear on youth in the five BRICS countries: Brazil, Russia, India, China and South Africa, which are home to nearly half of the world's youth. Very little is known about these youth outside of their own countries since the mainstream views on "youth" and "youth culture" are derived from the available literature on youth in the industrialized West, which is home to a small part of the world's youth. This book aims to help fill in this gap. The handbook examines the state of youth, their past, present and permits the development of insights about future. The BRICS countries have all engaged in development processes and some remarkable improvements in young people's lives over recent decades are documented. However, the chapters also show that these gains can be undermined by instabilities, poor decisions and external factors in those countries. Periods of economic growth, political progress, cultural opening up and subsequent reversals rearticulate differently in each society. The future of youth is sharply impacted by recent transformations of economic, political and social realities. As new opportunities emerge and the influence of tradition on youth's lifestyles weakens and as their norms and values change, the youth enter into conflict with dominant expectations and power structures. The topics covered in the book include politics, education, health, employment, leisure, Internet, identities, inequalities and demographics. The chapters provide original insights into the development of the BRICS countries, and place the varied mechanisms of youth development in context. This handbook serves as a reference to those who are interested in having a better understanding of today's youth. Readers will become acquainted with many issues that are faced today by young people and understand that through fertile dialogues and cooperation, youth can play a role in shaping the future of the world. Contents: History

of Concepts and Theoretical and Methodological Assumptions into Research on Youth: Knowledge about Youth in Brazil and the Challenges in Consolidating This Field of Study (Marilia Pontes Sposito) Historical, Theoretical and Methodological Background for Youth Studies in Russia (Mikhail K Gorshkov and Frants E Sheregi) Sociology of Youth: Substantive and Conceptual Issues (N Jayaram) Chinese Youth Studies in a Changing Society (Meng Lei) Review of Historical and Contemporary Concepts and Theoretical Assumptions in Youth Studies of South Africa (Mokong Simon Mapadimeng) Demographic Characteristics of Youth: Youth in Brazil: Concepts, Issues and Socio-Demographic Characteristics (Celi Scalon and Lygia Costa) Demographics of Youth in Russia (Sergei V Zakharov and Ekaterina S Mitrofanova) Indian Youth Population: Socio-Demographic Characteristics (Vinod Chandra) Demographic Characteristics of Chinese Youth (Zhang Yi and Tian Feng) The Demographic Profile of Youth in South Africa: Past, Present and Future (Martin E Palamuleni) Identity and Generation: Youth Generations and Processes of Identity Formation in Brazil (Wivian Weller and Lucélia de Moraes Braga Bassalo) Russian Youth: Specifics of Identities and Values (Svetlana V Mareeva) Contemporary Youth: Change of Referent, Loss of Identity (Ashok Kaul and Chittaranjan Das Adhikary) Youth Culture and Social Ecology: State, Market, Technology, and Grassroots Participation (Meng Lei) South African Youth Identity and Generation (Jayanathan Govender) Consumption and Leisure: Young

A book exploring particle size analysis of sedimentary deposits.

The techniques available for the study of sediments and sedimentary rocks form the focus of this book. While field aspects are included, greater emphasis is placed on the laboratory examination of sediments. Each chapter provides introductory background material and then proceeds to a discussion of technique, the equipment, and its limitations. A concluding section includes examples of how the techniques can be used to solve sedimentological problems. Techniques in Sedimentology is an unrivalled textbook for undergraduate and postgraduate students and of great use to many other geologists.

Saudi-born author Keija Parssinen's stunning debut offers the intricate, emotionally resonant story of an American expatriate who discovers that her husband, a Saudi billionaire, has taken a second bride—an emotionally turbulent revelation that blinds them both to their teenaged son's ominous first steps down the road of radicalization. Readers of *The Septembers of Shiraz* will be captivated by Parssinen's story of love and betrayal, fundamentalism, family and country in the Middle East. Anthony Swofford, author of *Jarhead*, hails Parssinen's characters as "richly conceived, and her evocative petrol universe of wealth,

privilege, and intrigue is unforgettable," characterizing *The Ruins of Us* as having "powerful storytelling that is refreshing and entertaining."

Along with the fast growing economy, the term "BRICs" was coined to represent the newly emerging countries, Brazil, Russia, India and China. This book shows readers that it is the profound social structural changes in these countries that determine their future, and to a large extent, will shape the socio-economic landscape of the future world.

This collection documents and analyzes, from different angles, the forces and trends that shape contemporary India's socio-economic reality. The contributors comprise an eclectic group—spiritual leaders, grassroots activists, as well as eminent thinkers from diverse fields like the judiciary, social development, environment, education, contemporary science and art. In contrast to the dominant characterization of a "Shining India" in recent years, these articles present a complex and multi-dimensional reality, essential for a balanced, objective understanding of the issues that shape today's India and indeed the world. *The Other India: Realities of an Emerging Power* focuses on an India far removed from a country of glass and steel high-rises and air-conditioned schools; glistening malls and multiplexes; and fashion shows, Bollywood and T20 cricket. It explores issues like poverty and social justice; the role of religion in society—from inspiring struggles for social justice to instigating terrorism—the dangers of mindless destruction of nature, violation of human rights and the role of social action. Here dispassionate analysis of history and contemporary forces alternate with straight-from-the-heart narratives of grassroots activists. Candid despair shares space with encouraging stories of collective action bringing about real change. This compilation will hold tremendous appeal for the general reader and will serve as an indispensable reference for policy-makers, academics and thinkers working in the fields of sociology, religion, environment, education, human rights, law and justice, development issues and politics. It is a must-read for anyone trying to get a holistic picture of contemporary India's dynamic society and economy.
