Introduction to Language Development by Scott F. McLaughlin

Generally, a child's first word is uttered sometime between the ages of 1 year to 18 months, and for the next few months, the child will remain in the "one word" stage of language development. During this time, children know a number of words, but they only produce one-word utterances.

Language Development | Introduction to Psychology

Talking is an important milestone in children's development. Most children will know how to say 100 words by the age of 21 months
