This book describes the modern transformation of Borneo and the eastern side of the Malay Peninsula, an area considered to be "environmentally critical" because of the massive deforestation that has taken place there since the 1960s. The conclusions indicate that great dangers arise from national policies that continue to treat this region as a "resource frontier" despite its growing resource scarcity.

Comprehensive and up-to-date, this book guides the reader through the complex stages of laboratory design and construction with practical advice and examples.

Media semiotics is a valuable method of focusing on the hidden meanings within media texts. This new edition brings Understanding Media Semiotics fully up to date and is written for students of the media, of linguistics and those interested in studying the ever-changing media in more detail. Offering an in-depth guide to help students investigate and understand the media using semiotic theory, this book assumes little previous knowledge of semiotics or linguistics, avoiding jargon and explaining the issues step by step. With in-depth case studies, practical accounts and directed further reading, Understanding Media Semiotics provides students with all the tools they need to understand semiotic analysis in the context of the media. Semiotic analysis is sometimes seen as complicated and difficult to understand; Marcel Danesi shows that on the contrary it can be readily understood and can greatly enrich students' understanding of media texts, from print media right through to the internet and apps.
