25 Paul Fussell, in *The Great War and Modern Memory* (25th anniversary edn, Oxford, Oxford University Press, 2000), argues that the classic war memoirs of the First World War should be understood as autobiographical novels in the same genre as James Joyce ' s *Portrait of the Artist as a Young Man* or Samuel Butler ' s *The Way of All Flesh*. 26 Peter Goldie, *The Mess Inside: Narrative, Emotion ...*

ancient ages to modern times is described in this article. The ... ancient man used primitive methods of drilling to create ... in 1848 and gave a big flow of crude oil [7].

This book describes efficient and safe repair operations for pipelines, and develops new methods for the detection and repair of volumetric surface defects in transmission pipelines. It also addresses the physics, mechanics, and applications of advanced materials used for composite repair of corroded pipelines. Presenting results obtained in the European Commission ' s INNOPIES FRAMEWORK 7 programme, it develops long-range ultrasonic and phased array technologies for pipeline diagnostics, and explores their interactions with discontinuities and directional properties of ultrasonic antenna array. The book subsequently shares the results of non-destructive testing for different types of materials applications and advanced composite repair systems, and characterizes the mechanical properties by means of fracture methods and non-destructive techniques. In turn, the book assesses the currently available technologies for reinforcement of pipelines, drawing on the experience gained by project partners, and evaluates the recovery of the carrying capacity of pipeline sections with local corrosion damage by means of analytical and numerical procedures. It develops an optimization method based on the planning of experiments and surface techniques for advanced composite repair systems, before validating the numerical models developed and experimentally gauging the effectiveness of composite repair with the help of full-scale hydraulic tests.

"Weyerman's collection of artists' biographies (1729) is exceptional for three reasons. Firstly, he includes a great number of painters not mentioned elsewhere. Secondly, he does not limit his selection to good artists only; he also discusses failed painters and their abortive careers. Thirdly, he writes as an art critic who does not hesitate to pass judgments, sometimes severe, on his chosen subjects. In the process, Weyerman provides much information on the social and economic circumstances of art production. He found that a bohemian lifestyle was pernicious to a painter's career, and argued that artists should live and think as merchants. In addition to analyzing Weyerman's art critical terminology and his ideas on art theory, De Vries includes translations of two full chapters along with the original Dutch"--

"The Clinical Guidelines have been developed to provide a series of evidence-based recommendations related to stroke. Development of the guidelines has been undertaken by a multidisciplinary Expert Working Group (EWG) using methodology consistent with National Health and Medical Research Council (NHMRC) standards."--Publisher's homepage.

An artfully illustrated account of the oil industry's most important events, HISTORY OF OIL WELL DRILLING records the beginning and development of the oil well industry from early water and brine well drilling to the vast oil industry of today. More than 1700 illustrations and 1500 pages trace the evolution of equipment and methods used in drilling for oil. Every major tool and method is described in detail. From the simple spring pole to the cable tool, rotary and portable rigs, Dr Brantly traces the origin, the development and the accessory tools of these major implements and compares them with modern equipment innovations. There is a comprehensive report on marine drilling and the vast offshore oil fields. Directional drilling, blowout prevention, formation testing and well instruments are other pertinent covered in this masterfully pictorial history.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

This book is a clinical manual that covers the whole spectrum of swallowing and its disorders. It starts with physiology of swallowing, pathophysiology of disordered deglutition, diagnostic methods (clinical and instrumental) and ends with an in-depth ' s and up-to-date presentation of current treatment options. The clinically most relevant topics of dysphagia management on the stroke unit and the intensive care unit are dealt with in separate chapters. Also the closely intertwined issue of nutritional management is specifically addressed. Most importantly, the book covers all obligatory topics of the Flexible Endoscopic Evaluation of Swallowing (FEES)-curriculum, an educational initiative that started in Germany in 2014 and is currently being extended to other European and non-European countries. The book is richly illustrated and an online video section provides a number of typical patient cases. FEES is probably the most commonly chosen method for the objective assessment of swallowing and its disorders. It is used in stroke units, intensive care facilities, geriatric wards but also in rehabilitation clinics and within dedicated outpatient services. This book on neurogenic dysphagia therefore addresses a wide range of different medical disciplines, such as neurologists, geriatricians, intensive care physicians, rehabilitation physicians, gastroenterologists, otolaryngologists, phoniatrists and also speech-language pathologists.

The Arab Spring, the continuing Israel - Palestine conflict... why does the Middle East dominate the news headlines so often? One obvious answer is oil, the lifeblood of our modern world. The crucial importance of oil alone ensures that the Middle East will remain in the headlines for years. The Middle East is also the birthplace of the world's three great monotheistic religions—Judaism, Christianity and Islam. It has also been the battlefield for each religion—trying to control the territory they consider holy. Nowhere are these conflicts more obvious than in Israel, and specifically in Jerusalem. Whether you understand it or not, events in the Middle East are destined to affect the lives of every person on earth! Bible prophecy gives us the clues to understand what will happen. This ebook, "The Middle East in Bible Prophecy", will help you better understand the troubled history of the Middle East—and its tumultuous future. Chapters in this ebook: -- Introduction: Worlds in Turmoil -- The Middle East: Worlds in Collision -- The Sons of Abraham -- The Rise and Fall of Ancient Israel -- The Four Empires of Daniel's Prophecies -- The Coming of Islam -- The Jews: From the Dispersion to the Modern Israeli State -- The Creation of the Modern Middle East -- A Rising Tide of Arab Nationalism -- Fundamentalist Islam Resurges -- Anger Mounts Following Gulf War -- Not Enemies Forever -- "Why Do People Hate Us So Much?" -- War and Peace in the Middle East -- What Is the "Abomination of Desolation"? -- Prophecy of an Arab Confederation -- What Should You Do? Inside this Bible Study Aid ebook: "It ' s impossible to understand the present Middle East without a knowledge of the three great religions that emanate from the area—Judaism, Christianity and Islam. These three faiths all trace their spiritual roots back to the same individual, Abraham." "However, conflict between Christians and Muslims has been a constant theme of history for 14 centuries." "Many other factors have contributed to the rise of Islamic fundamentalism and subsequent terrorism, including the Israeli-Palestinian problem and the domination of American culture." "After so much death and destruction, and centuries of war and unrest in the Middle East, imagine what a difference the second coming of Jesus Christ will make."

Photographs by one of French cinema's most influential and enigmatic artists. Any new film and any new book by French filmmaker Chris Marker is an event. Marker gave film lovers one of their most memorable experiences with *La Jet é e* (1962)—a time-travel montage set after a nuclear war that inspired Terry Gilliam's *Twelve Monkeys* (1995). His still camerawork is not as well known, but Marker has been taking photographs as long as he has been making films. *Staring Back* presents 200 black-and-white photographs from Marker's personal archives, taken from 1952 to 2006. Some of the photographs are related to his classic films (which include *Le Jet é e*, *Sans Soleil*, *¡ Cuba Sí!*, and *The Case of the Grinning Cat*), others are portraits of famous faces (Simone Signoret, Akira Kurosawa), but most are pictures of people Marker has encountered as he has traveled the world (an extra who appeared in Kurosawa's *Ran*, a woman seen on a street in Siberia). The central section of the book contains a series of photographs documenting political protests Marker has witnessed, including the march on the Pentagon in 1967, the events of May 1968 in Paris, and the tumultuous 2006 demonstrations protesting the French government's proposed employment policies. The photographs are accompanied by several unpublished texts by Marker, including the English language text of *The Case of the Grinning Cat* and Marker's annotations for some of the photos. The book—which appears in conjunction with an exhibition at the Wexner Center for the Arts at The Ohio State University—also includes essays by Wexner Center curator Bill Horrigan and art historian Molly Nesbit.
