Electronic CEU Opportunities/Trainings Behavioral Health Case Management is a process that includes planned linkage, advocacy and referral assistance provided in partnership with a consumer, family members, law enforcement personnel, community agencies and other supports as defined by the consumer.

Oklahoma Department of Mental Health and Substance Abuse ...

Oklahoma has implemented a Health Home service delivery model to improve care coordination and service integration, with the goal to improve health outcomes and controlling future health care costs for individuals with Serious Mental Illness or Serious Emotional Disturbance.

Adjunctive treatments, in which patients are provided additional modalities that can assist in their behavior change or the maintenance of their behavior change (i.e. telehealth, psychoeducation, consumer-driven treatment planning), have a useful role in addressing problems that can't be solved by face-to-face meetings. The adjunctive therapies covered in this book are all based on improving patient's self management of their problems or the factors that exacerbate their problems. The book is broadly organized into two sections. The first gives a broad overview of the major adjunctive modalities and the second concentrates on a systematic description of their role in the treatment of a number of special populations while providing practical suggestions for the timing and coordination for the use of the adjunctive therapies discussed in the book.

Mental Disorders--Mental Health Associations & Organizations--Government Agencies--Clinical Management--Pharmaceutical Companies.

Provides comprehensive coverage of 27 specific mental health disorders, from adjustment disorders to tic disorders, including a separate section devoted to pediatric and adolescent issues, as well as support systems and other resources.

Community-Based Psychological First Aid: A Practical Guide to Helping Individuals and Communities during Difficult Times presents a practical method for helping those in need in difficult times. No advanced training in psychology is needed to use it. Injuries from disasters, terrorist events, and civil unrest are not just physical. These events also cause psychological trauma that can do lasting damage. Psychological First Aid (PFA) draws on human resilience and aims to reduce stress systems and help those affected recover. It is not professional psychotherapy, and those providing this kind of aid do not need a degree to help. Gerard Jacobs has developed this community-based method of delivering PFA over 20 years and has taught it in over 30 countries. Along with the easy-to-follow method, Jacobs includes examples of how this works in action in different situations, and presents scenarios to practice. Unique in its approach of community engagement to train community members to help each other, this guide is an excellent resource for local emergency managers to engage in whole community emergency management. Presents a proven method for helping to alleviate the mental health effects of disasters, terrorist attacks, civil unrest, and other community stressors Offers a community-based model developed and taught by an international expert for over 20 years, requiring no advanced training or education in psychology to use Provides techniques that are adaptable to individual communities or cultures Outlines practices for self-care while helping others to prevent burnout Includes case studies, scenarios, and key terms to help facilitate community training
