The Structural Modeling course  
presents the flexibility of Petrel and the

# Access Free Petrel Structural Modeling

different approaches that enable you to build 3D models ready for simulation. The first part of the course demonstrates the real power of Petrel in building watertight frameworks of structurally and stratigraphically complex regions using the new Volume Based Modeling functionality.

## *Petrel Structural Modeling - NExT*

The Petrel E&P software platform provides a full range of tools to solve the most complex structural and stratigraphic challenges—from regional exploration to reservoir development. Within a single environment,

# Access Free Petrel Structural Modeling

geoscientists can perform the key geological workflows from stratigraphic and seismic interpretation through fracture, facies, and geocellular property modeling to history matching and production simulation.

The Petrel platform enables you to

## Access Free Petrel Structural Modeling

display drilling events in 2D or 3D, and correlates these events with geological properties to help you understand and avoid problems when drilling your next well. The Petrel platform enables the creation of geological targets and fine-tuning plans to position the well accurately in the zone of interest.
