This revised and updated edition of the Chronicle of Malaysia brings the full dramatic sweep of Malaysia's history up to date, taking the reader through the nation's first 50 years from the formation of Malaysia in 1963 all the way to 2013. It is packed with illustrated news stories covering hundreds of the nation's key social, political, cultural and sporting events. As a compendium of all aspects of

Malaysian life, the book captures the mood of the day with a sense of vividness and immediacy. Concise, accessible articles—revised and rewritten to engage today's readers—are introduced by headlines and liberally illustrated with photographs and specially commissioned cartoons. The book is structured chronologically, with an average of eight pages devoted to each year beginning with a succinct summary of the year's key events. A host of themes are covered: not just the major political and economic events but also the human side of the Malaysian experience—sports, fashion, music, the arts, architecture, lifestyle, disasters, crime and the social scene. These combine to give readers the feel of each era of Malaysia's past and enables them to draw parallels with the present.

From high-performance, economical and environmental points of view, Powder metallurgy process shows remarkable advantages in production of parts and components due to their special compositions by elemental mixing and 3-dimensional near net shape forming methods. Powder metallurgy process can be applied to not only metal materials but also ceramics and organic materials, which both are employed as structural and electrical products. Author contributions to Powder metallurgy present excellent and significantly important research topics to evaluate various properties and performance of P/M materials for applying these materials as actual components. In particular, the life estimation of P/M ferrous materials by sliding contact fatigue test and tribological performance evaluation of P/M semi-metallic materials are focused and introduced in this book.
