Rang & Dale's Pharmacology provides you with all the knowledge you need to get through your pharmacology course and beyond. Drs. Humphrey P. Rang, Maureen M. Dale, James M. Ritter, Rod Flower, and Graeme Henderson present a clear and accessible approach to the analysis of therapeutic agents at the cellular and molecular level through detailed diagrams, full-color illustrations, and pedagogical features. Find and cross-reference information quickly using a color-coded layout that makes navigation easy. Effectively understand and review key concepts through detailed diagrams and full-color illustrations that clarify even the most complex concepts. Reinforce your learning with key points boxes and clinical uses boxes that highlight crucial information and clinical applications. Apply current best practices and clinical applications through thoroughly updated and revised drug information. Stay current with the latest developments in the field thanks to major updates in chapters such as How Drugs Act; Amino Acid Transmitters; Analgesic Drugs; Antidepressant Drugs; and Drug Addiction, Dependence & Abuse. Tap into comprehensive content tailored to your courses with new and reorganized chapters on Host Defense; Inflammatory Mediators; Pharmacogenetics, Pharmacogenomics & Personalized Medicine; Hydroxyptomine & The Pharmacy of Migraine; and Purines.

Review what you learn in class and reinforce essential drug information. Using generic drug names, Rang & Dale's Pharmacology Flash Cards cover the actions, mechanisms of action, pharmacokinetic aspects, clinical uses and adverse effects of all important drugs. The 320 cards are divided into sets, each covering a different body system. Each card features a multi-color diagram that indicates how drugs may exert their action on that system. Detailed information is presented on the reverse side so that you can easily test your knowledge of the drug. With a portable format and references to Rang and Dale's Pharmacology, 7th Edition and Dale and Haylett: Pharmacology Condensed, 2nd Edition, these cards make it easy to review what you need to know in pharmacology. Includes multi-color diagrams of the main pathophysiology affected by drugs to put them in the context in which they act on the body. Details all important drugs and refers to drugs with similar actions/uses. Demonstrates clinical correlations so you can apply the material to real life situations. Presents the cards arranged by system to match Rang and Dale's Pharmacology, 7th Edition to better prepare you for exams, including Best of Five and USMLE Step 1. References Rang and Dale's Pharmacology, 7th Edition and Dale and Haylett: Pharmacology Condensed, 2nd Edition to allow ready access to further information. Provides a convenient hole-punched, ring-bound format to make the cards portable for easy use anywhere.

Adapted for the U.S., this New Edition of PHARMACOLOGY, a popular UK text, describes what drugs do and emphasizes the mechanisms by which they act. The U.S. edition is revised and updated to reflect the substantial differences in drug names, FDA approvals, terminology, and guidelines for use. It also boasts new and revised chapters to ensure that students are up to date on the very latest information. Each chapter begins with a summary of information essential to the chapter and key points are highlighted within the text to alert students to crucial concepts. Spanish version also available, ISBN: 84-8174-492-1

Organized in conjunction with Rang and Dale's Pharmacology 9th edition, Rang & Dale's Pharmacology Flashcards helps you review what you learn in class and reinforce essential information. One side of each flashcard features a diagram of the pathophysiological processes including the drug class at the top of the card. The back of the card details essential information for that drug class including actions, mechanism of action, pharmacokinetic aspects, adverse effects, the names of related drugs and important aspects of clinical use. Completely updated with the latest knowledge in pharmacology and clinical use. New chapter on drugs used for eye and skin conditions, new coverage of clinical use of biopharmaceuticals in a wide range of conditions, and a concise explanation of the rapidly growing impact of pharmacogenetics. Clinical correlations help you apply information to real-life situations. Compact and efficient size make it easy to carry selected cards with you and study on the go. A perfect study aid and complement to Rang & Dale's Pharmacology, 9th Edition—ideal for exam preparation.

Pharmacology Condensed, 2nd Edition is a companion volume to Rang et al's Pharmacology, sets out to provide the reader with the quintessence of pharmacology, delineating, in text and summary diagrams, the key points of the information which will be needed later in professional life. It will help reinforce the facts and concepts in pharmacology that are essential in appreciating how drugs work and their underlying pathophysiological processes. Each of the 49 short chapters adopts a standard approach and the book includes many illustrations specially designed to summarise textual material. Within each chapter, several drugs may be mentioned but only the most important drugs from each group are set out in bold type. Readers using this book will gain a fuller understanding of the essential aspects of pharmacology. It will also be of considerable help in preparing for examinations. This book is best used with Rang Pharmacology but can also be used in conjunction with another pharmacology textbook.

This new edition has been fully revised to bring pharmacologists and trainees fully up to date with the latest developments in the field of medical pharmacology. Beginning with an introduction to general pharmacological principles, the following sections discuss drugs for common and less common disorders found in different regions of the body. The seventh edition includes new drugs, as well as the latest therapeutic guidelines from authoritative sources such as the World Health Organisation (WHO) and the British National Formulary (BNF). Each topic includes key point summary boxes as well as illustrations, flowcharts and tables to enhance learning. A "problem-directed study" question at the end of each chapter helps trainees test their knowledge. An extensive appendices section includes a list of essential medicines, drugs that should/shouldn't be prescribed in pregnancy and lactation, and suggestions for further reading. Key points Fully revised, new edition presenting latest developments in medical pharmacology Includes therapeutic guidelines from WHO and BNF Problem-directed study questions and key point summary boxes enhance learning Previous edition published in 2008

An invaluable revision aid for those preparing for multiple choice questions in clinical pharmacy. Questions in this textbook are practice-oriented and are intended to assess students' knowledge of clinical issues, evaluative and analytical skills, and ability to apply their knowledge in clinical practice. Topics covered include: * Therapeutics and rational drug use * Aetiology of disease states * Presentation of conditions * Investigations and diagnostic testing * Drug therapy including adverse drug reactions * Drug interactions * Contra-indications The questions are presented as four practice tests, each consisting of 80 MCQs presented in a variety of formats. MCQs in Clinical Pharmacy is an indispensable aid for anyone preparing to sit a multiple choice question examination in pharmacy and for those carrying out a self-evaluation exercise for continuing professional development.

If you understand how drugs work (pharmacodynamics), how they are handled by the body (pharmacokinetics), how they interact with each other, and how drug treatments are assessed, then you will become a better prescriber. A Textbook of Clinical Pharmacology and Therapeutics gives you that understanding. Fully revised throughout and extensively illustrated, the fifth edition of this well-established textbook has been streamlined to focus on what medical students and junior doctors really need to know in order to understand the implications of prescribing one drug over, or in combination with, another. The text provides current information on all areas of drug prescribing with updated discussion and guidance on such topics as adverse drug reactions, 'personalized medicine', gene and cell-based therapy, advances in cancer therapy, and mechanisms of drug action and treatment guidelines in HIV and mycobacterial infections therapy. A new chapter on alternative medicines and nutraceuticals has been introduced and Further Reading lists have been updated to include key medical websites. All medical students and junior doctors who read this book will learn not only how to use drugs safely and effectively, but, importantly, the rationale behind effective prescribing decisions.
