This manual provides detailed solutions to virtually all the even-numbered exercises and worked- out solutions to the self-test problems.

This manual provides detailed solutions to most of the even-numbered exercises plus worked-out solutions to the self-test problems.

Written by Pin T. Ng, Northern Arizona State University. Consists of three major sections: the Objective section summarizes what is expected of a student after reading a chapter; the Overview and Key Concepts section provides an overview of the major topics covered in a chapter and lists the important key concepts; Solutions to Even-Numbered Problems section provides extra detail in the problem solutions.

This manual contains completely worked-out solutions for all the odd-numbered exercises in the text.

This book meets the specific and complete requirements of students pursuing MBA/PGDBM, B.Com., M.Com., MA(Eco), CA, ICWA, BBA, BIS/BIT/BCA, etc., courses, who need to understand the basic concepts of business statistics and apply results directly to real-life business problems. The book also suits the requirements of students who need practical knowledge of the subject, as well as for those preparing for competitive examinations.

Introductory Business Statistics is designed to meet the scope and sequence requirements of the one-semester statistics course for business, economics, and related majors. Core statistical concepts and skills have been augmented with practical business examples, scenarios, and exercises. The result is a meaningful understanding of the discipline, which will serve students in their business careers and real-world experiences.

This manual contains completely worked-out solutions for all the odd-numbered exercises in the text.
