In 1987, Dr. Alan Babizhayev, a Russian researcher, and his colleagues were the first to propose L-carnosine, a form of carnosine, as a possible treatment for cataracts. They developed N-acetylcarnosine eye drops to treat the condition. After the drops were used in human and animal clinical trials, positive results were documented.

Cataract surgery is a straightforward procedure that usually takes 30 to 45 minutes. It's often carried out as day surgery under local anaesthetic and you should be able to go home on the same day. During the operation, the surgeon will make a tiny cut in your eye to remove the cloudy lens and replace it with a clear plastic one.

*Cataract Cure: The Russian eye-drop breakthrough: The ...*

The only available treatment for cataract is surgery. Surgery requires highly-trained individuals with expensive operating facilities. Where these are not available, patients go untreated. A form of treatment that did not involve disurgery would be a useful alternative for people with symptomatic cataract who are unable or unwilling to undergo surgery.

An informative medical guide, The Cataract Cure provides cutting-edge information about N-acetylcarnosine's effects on slowing or stopping age-related cataracts without the need for surgery.

Within the optical field, there are several specialties. An ophamologist and optometrist are the highest grade of eye technician, doing surgery, removing cataracts, certified to use the excimer laser to cure nearsightedness, etc. One step below that is the optician, the eye technicians who takes eye tests and fits you for glasses and contact lenses among other things. Optometrists diagnose, manage, and treat basic conditions and diseases of the human eye. Their practice consists of eye examinations, diagnosis of problems, and the prescription of corrective lenses. Dispensing opticians fill the prescription that is written by an optometrist. They design, measure, fit and help select frames for their patients. An ophthalmologist is a physician who diagnoses and treats eye diseases. For the brain to interpret the information transmitted along the optic nerve, to blend the two separate images into a single image and to be able to judge distances correctly, the two eyes must work together.

We is an earth shattering dystopian novel that ruffled the feathers of the ruling elite of Russia when it was smuggled out of the country and published in English in 1924. It would not see publication in Russia until 1988. As a result of Yevgeny Zamyatin’s treatment over the novel he left Russia. We is set in the twenty six century where a totalitarian government rules the world. Every citizen has all of their needs completely taken care of. But the price is a life without passion, creativity, or adventure. Cities are made of glass to aid the government’s surveillance of its people. Citizens are given numbers rather than names to discourage individuality. But resentment and anger seethe just beneath the surface of the citizenry’s polite venter. It is time for someone to strike a blow for individuality and freedom. A fast paced adventure novel with a message that reverberated down through history. Brave New World, Anthem, 1984, and Player Piano all owe an enduring debt to We. Of writing Player Piano Kurt Vonnegut said “I cheerfully ripped off the plot of Brave New World, whose plot had been cheerfully ripped off from Yevgeny Zamyatin’s We.”

An easy-to-understand, up-to-date guide on the highly publicized drug, DMSO DMSO—dimethyl sulfoxide—is a simple by-product of wood and has been called a “miracle” drug, capable of relieving pain, diminishing swelling, reducing inflammation, encouraging healing, and restoring normal function. In this groundbreaking work, award-winning health science writer Dr. Morton Walker examines the powerful and compelling case for the use of DMSO in the treatment of many debilitating disease and health-related problems. In DMSO: Nature’s Healer, Dr. Walker cites documented cases of its astounding use in healing and prevention of a host of health disorders, including arthritis, stroke, cancer, mental retardation, and sports and auto injuries. He also recounts the dramatic story of the long struggle to gain FDA approval of DMSO.

Dr. William H. Bates discovered Natural Eyesight Improvement, 'The Bates Method'. His Experiments prove that tension in the outer eye muscles (oblique and Recti) disrupt, change the shape of the eye and focus of light rays in the eye resulting in; unclear close and distant vision, astigmatism, crossed, wandering eyes, cataract, glaucoma and other abnormal eye conditions. He proved that the outer eye muscles, (oblique) when relaxed, contracting, un-contracting normally change the shape of the eye to normal to produce clear close and distant vision. Relaxed ciliary, iris, tear gland and other inner, outer eye muscles also function correct, produce clear vision, healthy eyes. Mental, emotional strain, tension, using the eyes incorrect is the main cause of outer eye muscle, eye tension and unclear vision. Dr. Bates proved that relaxation of the mind, body, outer eye muscles results in a return of the eye to normal shape with correct focus of light rays in the eyes, on the retina with clear vision at all distances, removal of astigmatism and other eye problems, keeps the eyes healthy with normal circulation, eye pressure, correct function of the optic and other eye, visual system nerves. Abnormal pressure, tension, pulling on/in the eye, lens, retina is removed. The eye muscles; outer (oblique, recti & muscles for blinking, tears...) and inner (ciliary, iris,... muscles near and attached to the lens) function correct producing perfect; convergence, accommodation for clear close and reading vision, divergence, un-accommodation for clear distant vision. Shifting 'eye movement' with Central-Fixation (central vision) and function of the retina, lens, brain, entire visual system are perfect. A few of Dr. Bates older articles were based on the beliefs of most Ophthalmologists. As Dr. Bates cured his own vision naturally, treated his patients, performed experiments on the eyes, eye muscles, nerves-he changed his view on accommodation and other eye functions. He then practiced, applied natural eye, vision treatments without the use of eyeglasses, surgery, drugs. This is the origin of Natural Eyesight Improvement. Dr. Bates recorded all his natural treatments, work in his Clinic in New York City, U.S.A. and other hospitals, locations during his lifetime in his book 'The Cure Of Imperfect Sight By Treatment Without Glasses' & 11 years, 132 Issues of his Monthly Better Eyesight Magazine. Eyeglasses are often prescribed unnecessarily or 'too strong' (over-corrected) due to temporary nervousness, pressure to hurry, limited, incorrect eye, head, neck, body movement during an eye exam. Eye doctors also prefer to prescribe an 'extra stronger strength' to the eyeglass lenses. All eyeglasses, especially strong eyeglass lenses, bifocals, astigmatism lenses, sunglasses cause fast, increased vision impairment and prescriptions for stronger eyeglass lenses. This leads to increased vision impairment, cataracts and other eye health, vision impairment. Dr. Bates' Book, Better Eyesight Magazines and 20 Natural Eyesight Improvement Books are Free in E-Book form with this book, on our website; https://cleareyesight-batesmethod.info/

Your well organised book of medical expertise to one of the most important breakthroughs in recent times to help combat a disease called "senile cataract", which affects one in five people over the age of fifty-five.In the past, the only treatment available for this chronic condition was painful and potentially dangerous surgery to remove the cataract. Other treatments are now available, specifically, the new Russian breakthrough N-acetylcarnosine. In clinical trials, this treatment has shown dramatic and impressive results in treating age-related cataracts. This CATARACT BOOK also covers other associated eye disorders including: GlaucomaMacular DegenerationInfection of the corneaDry eye syndromeComputer vision syndromeEyestrainBlurred visionThe CATARACT HEALING BOOK is an essential resource for those cataract sufferers who are looking for an alternative treatment and want to avoid eye surgery.The answer to curing senile cataract is clear-don't lose sight of it!

Cataract Solutions: Prevention & Reversal Via Accelerated Self-Healing is a comprehensive guide to the science and art of healing cataracts naturally, using nutrition, herbs, homeopathy and light therapy. This book has been useful to support successful self-healing, as well as being a useful reference guide for caregivers, healers and holistic physicians. Dr. Swartwout shares three decades of accumulated knowledge, having helped hundreds of people avoid the most common surgery in Medicare. The best news is that when you improve your eye health naturally, not only is vision restored, but years and quality are added to your life. Modern surgery is wonderfurl, but it does not remove the underlying causes of cataract, which continue to affect the whole body. That is why the average life expectancy after cataract surgery is a mere 5 years. This is not generally thought about or talked about because the focus of our modern medical industry is on heroic intervention, with precious little time spent educating patients about health maintenance and primary disease prevention.

"A Family Guide to Childhood Glaucoma and Cataracts" was developed as a tool to aid families in navigating the many questions that arise from the diagnosis and treatment of childhood glaucoma or cataract. Each chapter is presented in a question-and-answer format, with images that make certain concepts and processes easier to understand. In addition to basic information about glaucoma and cataracts, topics addressed include doctor visits, medications, treatment options, eye surgery, contact lenses and glasses, low vision, genetics and heredity, related conditions, such as amblyopia (lazy eye) and strabismus, social, educational, and other nonmedical concerns, and definitions of common terms used by medical professionals serving patients with glaucoma or cataracts. The PGCFa is a support group for parents and families dedicated to issues related to pediatric glaucoma and cataracts. This organization provides education and support to families of children with these diseases around the world through its membership meetings, website (<http://www.pgcf.org>), discussion forums, and newsletter."
