The SPARC Technical Papers by Springer-Verlag New York Inc. ...

Sun Microsystems' SPARC architecture, based on the RISCs and SOAR architectures developed at UC Berkeley, was designed for easily pipelined, cost-effective, high-performance, multi-technology implementations. The goal is that the cost/performance ratio of successive implementations should scale with, or track, improvements in circuit technology while remaining ahead of CISC-based systems.

The Scalable Processor Architecture (SPARC) | SpringerLink

SPARC is a reduced instruction set computing instruction set architecture originally developed by Sun Microsystems. Its design was strongly influenced by the experimental Berkeley RISC system developed in the early 1980s. First developed in 1986 and released in 1987, SPARC was one of the most successful early commercial RISC systems, and its success led to the introduction of similar RISC designs from a number of vendors through the 1980s and 90s. The first implementation of the original 32-bit
