When Elephants Weep: The Emotional Lives of Animals ...

With chapters on love, joy, anger, fear, shame, compassion, and loneliness, all framed by a provocative reevaluation of how we treat animals, When Elephants Weep is the first book since Darwin's time to explore the full range of emotions throughout the animal kingdom, and it features a cast of hundreds. Meet Siri, the Indian elephant, whose impressive sketches have been praised by artists Willem and Elaine de Kooning.

When Elephants Weep - Jeffrey Moussaieff Masson

In "When Elephants Weep", author Jeffrey Moussaief Masson attempts to demonstrate that humans are far from being the only animals to lead complex emotional lives. If someone wanted to make a case for animal rights, it would probably have a greater chance of success if it were based on animal intelligence, as that is much easier to prove and quantify than emotions.

This national bestseller exploring the complex emotional lives of animals was hailed as "a masterpiece" by Elizabeth Marshall Thomas and as "marvelous" by Jane Goodall. The popularity of *When Elephants Weep* has swept the nation, as author Jeffrey Masson appeared on Dateline NBC, Good Morning America, and was profiled in People for his ground-breaking and fascinating study. Not since Darwin's *The Expression of Emotions in Man and Animals* has a book so thoroughly and effectively explored the full range of emotions that exist throughout the animal kingdom. From dancing squirrels to bashful gorillas to spiteful killer whales, Masson and coauthor Susan McCarthy bring forth fascinating anecdotes and illuminating insights that offer powerful proof of the existence of animal emotion. Chapters on love, joy, anger, fear, shame, compassion, and loneliness are framed by a provocative re-evaluation of how we treat animals, from hunting and eating them to scientific experimentation. Forming a complete and compelling picture of the inner lives of animals, *When Elephants Weep* assures that we will never look at animals in the same way again.

Based on award-winning scientist Marc Bekoff's years studying social communication in a wide range of species, this important book shows that animals have rich emotional lives. Bekoff skillfully blends extraordinary stories of animal joy, empathy, grief, embarrassment, anger, and love with the latest scientific research confirming the existence of emotions that common sense and experience have long implied. Filled with Bekoff's light humor and touching stories, *The Emotional Lives of Animals* is a clarion call for reassessing both how we view animals and how we treat them.

Reveals the remarkable depth of canine emotional complexity, explaining how dogs' sense of smell shapes their perception of reality and how they express such emotions as gratitude, loneliness, and love. Reprint. 100,000 first printing. Tour.

In this ground-breaking and highly controversial book, Jeffrey Moussaieff Masson attacks the very foundations of modern psychotherapy from Freud to Jung, from Fritz Perls to Carl Rodgers. With passion and clarity, *Against Therapy* addresses the profession's core weaknesses, contending that, since therapy's aim is to change people, and this is achieved according to therapist's own notions and prejudices, the psychological process is necessarily corrupt. With a foreword by the eminent British psychologist Dorothy Rowe, this cogent and convincing book has shattering implications.

The best-selling author of *When Elephants Weep* journeys into the mysteries of the feline mind, drawing on personal observations of his own five cats to illuminate the diverse ways in which cats reveal their emotions, and examines the fascinating evolution of the cat from solitary jungle predator to human companion. Reprint.

In the tradition of *Under the Tuscan Sun* and *A Year in Provence*, here is Jeffrey Moussaieff Masson's ode to his personal paradise—his adopted home, New Zealand. After living in California, why did Masson settle—out of all the places on earth—in such a faraway land? It turns out that while visiting a beautiful sandy beach just fifteen minutes from bustling Auckland, Masson and his family were utterly seduced by the exotic locale. There was little deliberation. This place, surrounded by lush forest on a bay dotted with volcanic islands, would be their new home. Masson takes readers on a remarkable journey to another world, as he and his family “slip into” the paradise that is New Zealand. For anyone who has ever dreamed of finding utopia, Masson reveals a country where neighbors talk to one another and provide a sense of real community—rarely, outside of the big cities, locking their doors—and where politics are as mellow as the weather. New Zealand is also a land of spectacular scenery, made even more famous for being the shooting location for the *Lord of the Rings* films. The flora is plentiful. Mangroves, banana plants, papaya trees, and more than ten thousand species of ferns grow wild and freely. The fauna is benign. There are no snakes, tarantulas, or scorpions. Children can walk to school barefoot without a care—there is nothing to sting them, bite them, or give them a rash. In the blue waters near the lush coastline, dolphins and orcas abound. While describing his love affair with the country and his affinity for its citizens, Masson reflects on the meaning of home, the importance of acting on intuition, and what happens when we lose our connection to the place we live in. Responding to an impulse, Masson reveals, he realized a dream. Featuring a its glossary of phrases used by New Zealanders and important Maori words, as well as the author's recommended travel itinerary, *Slipping into Paradise* is ideal for anyone planning a visit to this exquisite land. Full of photographs, delightful anecdotes, and little-known facts (jogging, for example, was invented in New Zealand), *Slipping into Paradise* is also a book for those who fantasize about dramatically changing their

Access Free When Elephants Weep The Emotional Lives Of Animals By Jeffrey Moussaieff Mon Susan Mccarthy Contrtion By Susan Mccarthy

lives—and who imagine something better for themselves. Jeffrey Masson's message: New Zealand awaits.

By way of a personal note, I can reveal to the reader that I was led to Sanskrit by an exposure to Indian philosophy while still a child. These early mystical interests gave way in the university to scholarly pursuits and, through reading the works of Franklin Edgerton, Louis Renou and Etienne Lamotte, I was introduced to the scientific study of the past, to philology and the academic study of an ancient literature. In this period I wrote a number of books on Sanskrit aesthetics, concentrating on the sophisticated Indian notions of suggestion. This work has culminated in a three-volume study of the Dhvanyaloka and the Dhvanyalokalocana, for the Harvard Oriental Series. Eventually I found that I wanted to broaden my concern with India, to learn what was at the universal core of my studies and what could be of interest to everyone. In reading Indian literature, I came across so many bizarre tales and ideas that seemed incomprehensible and removed from the concerns of everyday life that I became troubled. Vedantic ideas of the world as a dream, for example, to which I had been particularly partial, seemed grandiose and megalomaniac. I turned away with increasing scepticism from what I felt to be the hysterical outpourings of mystical and religious fanaticism.

A heartfelt exploration of human grief after the loss of a pet by the New York Times bestselling author of *Dogs Never Lie About Love*. Over 84 million Americans—almost 3/4 of the US population—own a pet, and our society is still learning how to recognize and dignify that relationship with proper mourning rituals. We have only recently allowed the conversation of how to grieve for our non-human family members to come front and center. *Lost Companions* fills a specific, important demand, a massive need in the market for an accessible, meaningful book on pet loss. Jeffrey Moussaieff Masson takes a very personal, heartfelt approach to this difficult subject, allowing readers to explore their own responses and reactions, suggesting ways through and out of grief, as well as meaningful ways to memorialize our best friends. *Lost Companions* is full of moving, thought-provoking and poignant stories about dogs, cats, horses, birds, wombats and other animals that beautifully illustrate the strong bond humans form with them.

Jeffrey Moussaieff Masson's groundbreaking bestseller, *When Elephants Weep*, was the first book since Darwin's time to explore emotions in the animal kingdom, particularly from animals in the wild. Now, he focuses exclusively on the contained world of the farm animal, revealing startling, irrefutable evidence that barnyard creatures have feelings too, even consciousness. Weaving history, literature, anecdotes, scientific studies, and Masson's own vivid experiences observing pigs, cows, sheep, goats, and chickens over the course of five years, this important book at last gives voice, meaning, and

Access Free When Elephants Weep The Emotional Lives Of Animals By Jeffrey Moussaieff Mon Susan Mccarthy Contrtion By Susan Mccarthy

dignity to these gentle beasts that are bred to be milked, shorn, butchered, and eaten. Can we ever know what makes an animal happy? Many animal behaviorists say no. But Jeffrey Masson has a different view: An animal is happy if it can live according to its own nature. Farm animals suffer greatly in this regard. Chickens, for instance, like to perch in trees at night, to avoid predators and to nestle with friends. The obvious conclusion: They cannot be happy when confined twenty to a cage. From field and barn, to pen and coop, Masson bears witness to the emotions and intelligence of these remarkable farm animals, each unique with distinct qualities. Curious, intelligent, self-reliant—many will find it hard to believe that these attributes describe a pig. In fact, there is much that humans share with pigs. They dream, know their names, and can see colors. Mother cows mourn the loss of their calves when their babies are taken away to slaughter. Given a choice between food that is nutritious or lacking in minerals, sheep will select the former, balancing their diet and correcting the deficiency. Goats display quite a sense of humor, dignity, and fearlessness (Indian goats have been known to kill leopards). Chickens are naturally sociable—they will gather around a human companion and stand there serenely preening themselves or sit quietly on the ground beside someone they trust. For far too long farm animals have been denigrated and treated merely as creatures of instinct rather than as sentient beings. Shattering the abhorrent myth of the “dumb animal without feelings,” Jeffrey Masson has written a revolutionary book that is sure to stir human emotions far and wide.

Weaving history, literature, anecdotes, scientific studies, and his own vivid experiences observing pigs, cows, sheep, goats, and chickens over the course of five years, Masson gives voice, meaning, and dignity to these gentle beasts that are bred to be milked, shorn, butchered, and eaten.
